

TITUS

U1 Medical Series

Key Benefits

- Battery Alerts
- In Storage / Transit Monitoring
- Inventory Management
- Remote Diagnostics
- Drop in replacement for U1 lead acid batteries
- Robust design using large format cells to decrease potential failure points
- Multiple communication platforms including SMBus 1.1/BLE
- Light Weight
- Zero Maintenance
- Designed to communicate with inverter/chargers made by Tripp Lite and POWERVAR

We are proud to say...
the **TITUS U1 Medical Series**
is “**Made in the USA**”

Devon Company Introduces..

a family of state of the art Lithium Iron Phosphate battery packs built for the medical industry, specifically designed for Medical Carts and Mobile Work Stations. With a collective experience of over 100 years in stretching the boundaries of possibilities in battery technology, Devon is proud to say that the TITUS U1 Medical Series is Made in the USA, using state of the art electronics and mechanical design.

This series offers the quality, reliability and safety required by the medical market. Our quality claim is backed up by U.L. certifications and 100% product testing.

TITUS Medical Series offers the first in its class, advanced communication option. This enhances both usability and safety, by communicating with applications across a wide array of devices.
